

Description

Investment of State of Nevada funds within the General Portfolio is a function performed by the State Treasurer, who, by the provisions of state statute, has adopted guidelines for the prudent investment of these funds. The investment portfolio encompasses the General Fund, the purpose of which is to finance the ordinary operations of the State and to finance those operations not provided for in other funds. The majority of General Fund revenues are received from gaming taxes, sales and use taxes, insurance premium taxes, business license taxes, cigarette taxes, property taxes on net proceeds of mines, and casino entertainment taxes.

The investment portfolio also includes monies deposited in Special Revenue Funds, which are used to fund highway projects, Municipal Bond Bank transactions, and some of the activities of the State's regulatory agencies, and in Enterprise Funds, which are used to fund development and control of water and power resources and to fund housing projects. Investment objectives include safety of principal, portfolio liquidity, and market return, which is consistent with a conservative, moderate duration portfolio of securities. As of September 30, 2002, the portfolio had a par value of \$920,518,000.

Investment Guidelines

The permissible investments of the General Portfolio include United States treasury and agency securities, repurchase agreements, high quality corporate notes and commercial paper, negotiable certificates of deposit, and banker's acceptances. These securities are diversified to prevent over concentration in a specific maturity, a specific issuer, or a specific class of securities. The average maturity of the portfolio must not exceed two years, and no single security may be longer than ten years.

General Fund Portfolio
Portfolio as of September 30, 2002

At September 30, 2002 the weighted average maturity of the General Portfolio was 217 days, and has ranged from 200 to 301 days in the past year...

The State Treasurer maintains a conservative, moderately active investment strategy, having the ability to take advantage of longer-term market opportunities as they occur by analyzing projected cash flow. In order to prevent the forced sale of securities prior to maturity, a "Minimum Liquidity Requirement" is imposed which projects the cash flow needed to pay obligations within a four-week period. All securities to be included in this requirement must mature within 28 days. At September 30, 2002 the weighted average maturity of the General Portfolio was 217 days, and has ranged from 200 to 301 days in the past year.

Performance

The General Portfolio's performance is monitored on a weekly basis. The benchmark used to assess this performance is the one-year Constant Maturity Treasury Index (1 Year CMT). As of September 30, 2002, its yield outperformed this benchmark by 136 basis points.

As of September 30, 2002, its yield outperformed this benchmark by 136 basis points...

HISTORICAL GENERAL PORTFOLIO YIELD

Administration

The State Treasurer adopted an Investment Policy, which was last approved by the State Board of Finance on June 11, 2002. In 1992, the Municipal Treasurer's Association of the United States and Canada awarded the Certification of Excellence to the State Treasurer in recognition of his outstanding written investment policy. The State of Nevada was the first state in the nation to receive this award. The General Portfolio may be audited at any time either internally or externally. Investment procedures and strategies are reviewed quarterly by the State Board of Finance.
